

## REQUESTS – PROPOSALS

Dear sirs/madams,

We have 2 requests - proposals for organizing business in Lithuania.

1. We offer to organize the export business of drinking mineral water in Lithuania. Lithuania has very favourable conditions and opportunities for this. Lithuania currently uses only 12-14% of its good quality underground water reserve for its internal needs.

The relevance and need for drinking water in the world is constantly increasing, so the drinking water business is becoming more and more promising as well as profitable.

For that purpose, a water export company should be established on the basis of a joint stock Lithuanian-foreign company.

According to our calculations, the investment would reach 19 million euros. This investment amount should be returned within 5 years, and the investor would become a co-owner of this company. If this offer is of interest and a potential investor - partner appears, we would send him the business plan for this water.

Whoever helps to find the necessary investor - partner for this business, the reward would be 50 thousand euros after the registration of the company in Lithuania and the first money transfer.

We ask you, if there is an opportunity, to help us find the necessary investor - partner or to advise with whom we can discuss this matter.

2. To establish a Lithuanian fruit, vegetable, berry export company in Lithuania together with a foreign investor - partner on the basis of a joint stock company. The economic-financial reasoning of this project is also ready. Investment amount: 8 million euros. Investment return within 3.5 - 4 years.

It is possible to start the implementation of both projects at once, or one by one separately.

Sincerely yours,

Timas Tunikaitis
